Graduated

EXPERIENCE

Physis3D, Washington, DC

Medtech startup in ideation / pre-seed phase

Founder

May 2026 - Present

- Built a 0→1 healthcare venture by defining the clinical problem, shaping the product vision, and ideating an early MVP for pediatric small-bone and growth-plate-sensitive surgical navigation
- Shipped early company assets by securing the domain, launching the website, and creating the LinkedIn profile
- Developed business plan and pitch deck around ICP, value proposition, commercialization, and acquisition potential
- Drove early venture momentum through co-founder recruitment and a crowdfunding campaign to support trademarking, incorporation preparation, and early validation costs

Learvo, San Francisco, CA

Product Management Intern

Feb 2025 - June 2025

- Collaborated with design and technology teams to shape customer experience, support product delivery, and translate user needs into actionable product requirements
- Conducted market analysis to spot opportunities for new products and competitive positioning

Johns Hopkins University, Baltimore, Maryland

Startup Consultant - Class Practicums

Aug 2024 - May 2025

- Worked closely with founders to sharpen business development, go-to-market, and commercialization strategies for early-stage healthcare and technology ventures
- Gathered primary and secondary research on user behavior, market dynamics, competitive standing, and critical success factors
- Created presentations, documentation, RFP responses, and client-facing collateral to communicate progress, learnings, trade-offs, and strategic recommendations
